

# Installation Manual of Tank Trim

Please show the manual to final customer.

## General Drawing

## Installation

### 1. Installation of fill valve

Take off the tamper proof, and adjust the height by screwing the upper and lower tube. Then fix the tamper proof.

Pull the adjusting rod, and raise or lower the fixed ring to the desired water level.

Unscrew the locknut and washer. Position the fill valve into the tank, then screw the washer and locknut.

### 2.The installation of flush valve

Screw the flush valve tight, and make sure the fixture block and seal washer attach on the tank wall. Put the flapper on the flush valve .

Adjust the angle of the flush valve, make sure the flapper is easy to open, and the chain is not blocked.

Screw the flush valve tight, and make sure the fixture block and seal washer attach on the tank wall. Put the flapper on the flush valve .

### 3.Installation of push button

Loose the nut clockwise take away the nut and the washer from the rod.

Install the rod into the tank handle hole.

Enter the nut on the handle and tighten.

#### WARNING:

Do not use an in-tank type bowl cleaner in your toilet. In-tank cleaners containing chlorine (calcium hypochlorite) can seriously damage fittings in the tank. We shall not be responsible for any tank fitting damage caused by the use of cleaners containing chlorine (calcium hypochlorite). We will not be liable for damages due to improper handling or installation, abuse, or alteration of the product. We disclaims any responsibility for incidental or consequential damages.
